

ATHOS WELDING BLANKET

Description

Athos is fibreglass fabric with a special fire retardant PU coating on both sides (to improve anti slip and strength properties).

Application

The maximum application temperature for flame protection is 550 °C, shortly up to 900°C.

Conditions for use

- CEPRO recommends the use of multiple layers for maximum protection.
- Always use welding blankets at an angle of at least 15 degrees.
- The temperatures shown are only an indication. The suitability of the selected product should always be tested beforehand.
- Regularly check welding blankets for tears and or other damage. Replace damaged blankets where necessary.
- Welding blankets can be used for many purposes and therefore, no guarantee can be given on their use. The end user is responsible for determining whether the welding blanket is suitable for use in a specific situation and whether it offers sufficient protection during the work to be performed.
- CEPRO welding blankets are sewn on the cut edges with best quality Kevlar thread.

Characteristics

Athos welding blankets are very suitable for horizontal use.
